

Self-amplifying RNA (saRNA) Biotech – VC Investment Opportunity

Self-amplifying RNA (saRNA) Virtual Biotech seeks VC investment to develop pipeline of RNA therapeutics and vaccines

- + Novel self-amplifying RNA (saRNA) Technology Platform.
- + Strong IP position on saRNA Technology Platform and Nanoparticle Delivery Vehicle.
- + This company's Technology Platform is the "Next Generation" approach for mRNA therapeutics, cancer vaccines and infectious diseases. Multiple gene delivery, can deliver antigen or protein.
- + Superior dosing and production method by virtue of biosynthetic and self-assembling delivery system when compared to current lipid coated mRNA technology.
- + Four (4) Oncology programs are Non-Viral Gene Therapies; Technology Platform is applicable for vaccines and rare diseases too.
- + Demonstration of Technology Platform Process with Proof of Concept Studies.
- + Financing will be utilized for advancement of the oncology pipeline and continuing demonstration of process scalability.
- + This company plans to have multiple assets in the clinic by 2023.
- + Leadership Team with big pharma experience (ex-GSK). Very Strong Scientific Advisory Board. Company is based in northeastern USA.
- + Please request the CIM after Fully Executed NDA.
